

JOHN LEE STUDIO

In a decade of corporate experience, I learned what clients want. In a lifetime of creative education, I learned what people need: Graphic design and illustration that fulfills business wants while satisfying individuals' needs for unique images made just for them.

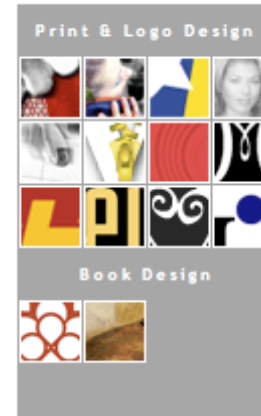

Whether you are a large agency in need of short-term contract work or a small start-up looking for a unique corporate identity, I deliver a wide range of design and multimedia services, from conception to completion.

JOHN LEE STUDIO

Whether designing a company logo or a full-color, full-page ad, my designs range from the simple and classic to the ornate and bold--or, in many cases, somewhere in-between, depending on the taste of the client and desired effect.

With more than a decade of using and teaching applications such as QuarkXPress, Freehand, Illustrator and Photoshop, I have the expertise needed to bring your message and vision to your intended audience.

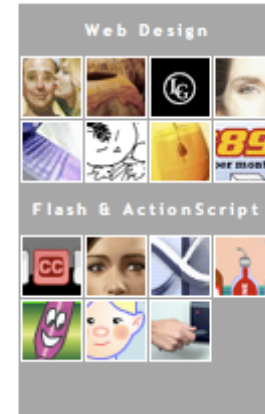

Graphic Design

JOHN LEE STUDIO

While no longer 'new,' the internet has changed the way the world does business. Thanks to experience in Dreamweaver, GoLive and Flash (with Actionscript), my websites offer varying degrees of viewer involvement, from clean, simple designs to animation for a richer interactive experience.

Web Design

JOHN LEE STUDIO

If you have a particular look in mind but aren't sure what to do with it, let me help further articulate your ideas. I offer copywriting for your project, standalone or as a part of an overall campaign, as well as expository or adversarial magazine articles and blog entries. Copyediting is also available to ensure that your message reaches the right audience in the right way.
